2019

Ramos&Bassols

After several years of experience in different fields such as urban furniture, tableware, lighting and office furniture, etc... David Ramos and Jordi Bassols have created in 2004 Ramos + Bassols studio.

Based in Barcelona, they offer a personal view on contemporary design. "We always search the balance between form, function and aesthetics in our products". In the last years, the studio has received several international awards such as: Hospitality Design Product 2010, International Interior Design Association 2010 award, The IF Design award 2015, the Red Dot Award 2015, and the Gold award Best of Neocon in 2016.

Copa Soft stool

“The Copa stool becomes the square of the circle for the successful family designed by Ramos&Bassols. This new version of the seat represents one of the maxims of the Viccarbe collection: to continue the journey of existing families, providing greater versatility and adaptability to spaces.”

On this page, a picture of Copa bar stools with four wooden legs base

COPA SOFT

Meet the Copa Soft, with a silhouette that is even more comfortable, inviting and enveloping for the collection of wide and finely balanced collaborative seats designed by Ramos & Bassols. Copa evolves as a tribute to extreme comfort, making users want to collaborate and remain seated for hours.

We incorporate a two-tone backrest to the collection, offering the possibility of combining leather and eco-leather on the exterior with any of the fabrics in our range in the interior part, enhancing its uniqueness.

The Copa Soft is incorporated to all the pieces in the collection - chair, lounge chair and stool in counter & bar height - and can be combined with any of the available bases. A versatile design without stridency, prepared to be part of new and exciting ancillary projects all around the world.

“Its “soft” upholstery is pure sophistication, managing to convince the users at first sight and also fulfilling its promise the moment they finally sit down on it.”

Copa & counter

Office — Thanks to its wide seat, the stool is as comfortable as the chair, ideal for canteens, coworkings and bar areas.
