Designed by Jaime Hayon

Catalogue - EN

2017

## Jaime Hayon

Spanish artist-designer Jaime Hayon was born in Madrid in 1974. After studying industrial design in Madrid and Paris he joined Fabrica - the Benetton-funded design and communication academy in Italy- in 1997 where he directed the design department until 2003.

Hayon set up his own studio practice in the year 2000 and dedicated himself fully to his personal projects from 2003 onward, today he is one of the most acclaimed creators worldwide.

# Aleta,

## Finding Elegance in The Subtle

Collection designed by Jaime Hayon, 2017

If we look for a leitmotif in the Viccarbe collection, that would be the combination of synthetic structures and extra comfortable seats. The simplicity, the contemporary design of its chairs and armchairs comes from the hand of bases that have the precise material to define the use and the function, free of all useless adornment. On the other hand, comfort comes from subtle details on both the inside and outside of each piece. Aleta was born in this way, achieving a perfect balance capable of fulfilling the creative proposal of Jaime Hayon, and the evolutionary proposal of the Viccarbe collection.

*"With the international vision, with the mixture of know-how, and of combining different ideas and dialogues, certain products were released with which we are very satisfied today.*

*As a designer—just like Viccarbe—I'm very functional. Not minimalist, but simple. (...) With Viccarbe, the idea was to find a mutual language. The turning point has perhaps been found by making a few more expressive forms on the chairs or tables we have made, finding a way, a balance for both. I believe that the real collaboration with companies is this: to find a balance."*

*"The simplicity, the contemporary design of its chairs and armchairs comes from the hand of bases that have the precise material to define the use and the function, free of all unnecessary adornment."*

*“Conventional meeting rooms are no longer the only spaces where teams work to transform organizations.”*

The limits between spaces are blurred. Conventional meeting rooms are no longer the only spaces where teams work to transform organizations. We feel more comfortable in familiar surroundings, in places similar to the living room, where we regain confidence in ourselves and feel like participating. We also feel comfortable in relaxed environments such as a café, where we can hold informal meetings where we can take a stance and strengthen ties with other colleagues in the organization.

## Aleta & Work

Office — The Aleta chair was born to materialize the perfect balance between functionality and creativity. Aleta works perfectly in any situation: having lunch in a restaurant, an extended meeting at the office or working from home.

# Aleta wooden base

Warm, elegant, contemporary... The versatility of a chair does not only lie in its initial design. It also lies in the possibility of incorporating different finishes in it. Aleta and its wooden base allow us to play with ambiguity. They give us the possibility to create multipurpose spaces where we are not limited by the use, but inspired by the warmth of the finishes. In this case, it does not matter where we live our day to day life, but the comfort with which we approach it.

## Unwind Hotel Otaru, (Japan)

*Hospitality* — Unwind Otaru represents the renovation of an old building located in the prefecture of Hokkaido, north of Japan. Its vintage aesthetic combines perfectly with the contemporary furniture and finishes chosen for the new layout. As with the Aleta collection, achieving the right balance is fundamental.
