Victor Carrasco

Born in Valencia (Spain) in 1974, Victor Carrasco began his professional career after graduating Cum Laude in Industrial Design Engineering at the Polytechnic University of Valencia.

Far from fashions and trends, he develops and puts international brands in the center, with remarkable added value, thanks to his passion for synthesis, sustainable growth and his pragmatic vision of the future.

Founder and Strategic Director at Viccarbe, a role that he combines since 2007, with being one of the counselors of Steelcase, the prestigious American multinational company, he also collaborates with many other renowned brands.

Throughout his career, he has been honored with the most prestigious prizes such as Príncipe Felipe Award for Entrepreneurial Excellence, German Design Award, IF Design Award or the Iconic Awards 2022: Best of Best Innovative Material, among others.

FUSTE

A tribute to classic architecture

Collection designed by Victor Carrasco, 2023

Warm, perfectly balanced, and subtle. Fuste is our tribute to classic architecture. A collection of solid oak tables with organic lines, designed by Victor Carrasco to be the nexus where meetings, gatherings, and celebrations encounter. Its oval-shaped tabletop, with a very light and almost ethereal outline, contrasts with its much more ornamented legs, conveying a special allure to its almost sculptural design.

The table collection takes its name from the indispensable point of union between the column's base and capital, the shaft

- *Fuste* in Spanish -, an unmistakable architectural element since the times of classical Greece. This section is its *raison d'être*, as every column is raised with it and can never be conceived without it. An essential element, materialized in four solid oak legs, that connect and give meaning to the overall table concept.

This interplay between the lightness of its tabletop, and its distinctive four legs, designed with delicate vertical lines, pay tribute to traditional woodworking, carpentry, and the heritage of true craftsmanship. The start of fine design.

"A minimalist piece meticulously crafted in solid oak wood, to transmit warmth, dimension and durability to any atmosphere."

WARM MINIMALISM

Designer Victor Carrasco envisioned the table collection as a further step in his search for balance and warm minimalism. A table of pure organic shapes, designed to suggest but not impose and add value and warmth to all sort of spaces, from domestic to hospitality, from corporate to contract.

ELECTRIFICATIONS

The table can include our patented electrification system, bringing agility to every working or socializing environment. Designed by Viccarbe's engineering team, the cable is hidden through one of the legs, with no visible joints or screws as it works by magnetic attraction. With a simple gesture, users can easily conceal cables, keeping the space clutter-free. On the tabletop, Fuste can include a powerbox that integrates and respects the table's ethereal silhouette. A practical technical solution that does not interfere and brings incalculable added value .
